Strategic Collaboration Between Kabuto Helmets and Honda Motor Europe

In a significant move to enhance rider safety and experience, Kabuto Helmets and Honda Motor Europe have established a strategic partnership. This collaboration brings together Kabuto's expertise in helmet technology and Honda's legacy in motorcycle manufacturing, aiming to provide riders with superior safety gear and motorcycles.

Kabuto Helmets: A Legacy of Protection

Established in 1982, Kabuto Helmets has been at the forefront of helmet innovation. The company introduced the world's first helmet with upper ventilation in 1992 and continues to develop advanced features such as the patented Wake Stabilizer and Advanced Composite Technology (A.C.T.) shells. These innovations ensure optimal aerodynamics, comfort, and safety for riders.

Honda Motor Europe: Engineering Excellence

Honda Motor Europe, a subsidiary of the global Honda brand, is renowned for producing motorcycles that combine performance, reliability, and innovation. With a diverse range of models catering to various riding styles and preferences, Honda has established itself as a leader in the motorcycle industry.

Synergy for Enhanced Rider Experience

The partnership between Kabuto Helmets and Honda Motor Europe is a natural alignment of two brands committed to quality and innovation. By offering Kabuto helmets through Honda's extensive dealer network, riders have convenient access to premium safety gear that complements their motorcycles. This collaboration ensures that riders can enjoy a cohesive and enhanced riding experience.

Product Integration and Availability

As part of this collaboration, select Kabuto helmet models, are available at Honda dealerships across Europe. These helmets are designed to meet the diverse needs of riders, offering features such as lightweight construction, advanced ventilation systems, and aerodynamic designs.

Conclusion

The alliance between Kabuto Helmets and Honda Motor Europe represents a shared commitment to rider safety, comfort, and performance. By combining their respective strengths, the two companies are poised to deliver an integrated riding solution that meets the evolving needs of motorcyclists across Europe.

COOLMAX

Coolmax fabrics include key features like enhanced breathability, effective temperature and moisture regulation, and quick-drying properties

Mips

The Mips safety system features a low-friction layer inside a bike helmet that allows a multi-directional movement of 10-15mm on certain angled impacts, intended to help reduce rotational force to the head.

A.C.T

A.C.T. is a multi-layer Advanced Composite Technology, which is a combination of hyper glass fiber and high-tensile-modulus organic fiber, designed for each model that results in light weight shells and high and low impact velocity resistance with increased energy absorption.

wake PAT

The patented Wake stabilizer system controls the aerodynamic airflow near the helmet while riding, preventing any kind of drag and reducing helmet lift, therefore increasing stability and comfort.

T.P.S.

High-grade Thermoplastic material offering exceptional impact resistance providing unmatched lightweight strength, precise molding for consistent protection

PINLOCK

Pinlock fog resistant insert lenses are made from a moisture absorbing material, that prevents fogging and results in a clear field of view under any circumstance

Adventure Touring

GEOSYS GT Mips

Commit to the Adventure

Strap yourself and commit to the adventure with the GEOSYS GT Mips adventure touring helmet.
Engineered to provide everything you need for a comfortable and safe ride, even on the most rugged terrain. It's the perfect fusion of comfort and protection

Features

- Versatile for both on-road and off-road use – compatible with both shield and goggles.
- 5-stage adjustable peak for glare and debris protection.
- Large seesaw-type top vent and independent chin vent for optimal airflow and fog prevention.
- Removable shield can be taken off without detaching the peak.
- Mips® Evolve Core system for enhanced rotational impact protection.
- Wake Stabilizer (PAT.4311691) reduces air drag and neck fatigue.
- Lightweight yet strong A.C.T. shell for enhanced protection.
- Quiet and stable ride performance, even at higher speeds.
- Eyewear-compatible cheek pads for rider comfort.
- Moisture-wicking COOLMAX® interior lining for lasting comfort.
- Pinlock® 120XLT fog-resistant lens with MaxVision™ technology included

Open Face

EXCEED

Urban Legend

When you are on the bike or scooter, this Urban warrior with high performing ventilation and panoramic field of view will bring a smile on your face and be your everyday friend while riding even through the most dens city's

Features

- Lightweight yet strong – FEM analysis ensures an ideal balance of weight and safety.
- Impact-absorbing liner for improved protection.
- Advanced airflow via wide vent tunnels and user-friendly ventilation system.
- Wake Stabilizer (PAT.4311691) reduces wind resistance and rider fatigue.
- Advanced Thermoplastic (ABS) shell
- 2 shell sizes across 5 fitting sizes for a better, more compact fit.
- Wide inner sunshade offers enhanced sun protection.
- Comfort-focused interior with snug fit, new cheek pad stitching, and COOLMAX® washable padding.
- Glasses-friendly design for easier eyewear use.
- Easy shield replacement with the SAJ Shield System (PAT.4839373).
- Optional Pinlock® 120XLT fog-resistant lens available.
- Micro ratchet buckle with secure multi-point engagement and easy release

Certification: ECE 22/06

Modular Tour

RYUKI

Global Explorer

The sensation of mountain road, far away villages and amazing routes. The RYUKI is comfortable in all circumstances. Well-engineered ventilation system and modular shell construction provide the best solution for every ride

Features

- Chin-Opening system
- Lightweight optimized design.
- UV-CUT CM-2-P shield with easy replacement system for simple and fast shield changes.
- Built-in retractable sunshade (CM-2) for comfort in bright conditions.
- Pinlock® 120XLT fog-resistant lens with MaxVision™ technology included.
- Large breath guard enhances visibility and breathability in multiple conditions.
- Glasses-friendly cheek pads for added comfort.
- Wake Stabilizer (PAT.4311691) reduces wind resistance for more stability while riding.
- Advanced Thermoplastic (ABS) shell
- Easy ventilation system for comfort.
- Removable & washable interior padding.
- Micro ratchet buckle for secure and adjustable fit.
- Wind shutter included to reduce wind entry from the chin area.
